

CHAMPIONSHIP START SYSTEM

Rugged durability and long lasting performance.

The Championship Start System allows you to design a customized start solution for your pool. It can drive speakers mounted under the starting blocks, and is the only start system that will drive the Relay Judging Platform speedlights and deckside start indicators; which are synchronized with the start horn and strobe.

Key Features:

Relay judging platform speedlights

The Championship Start System is the only start system that will drive the speedlights and deckside start indicators on the Relay Judging Platforms for up to 12 lanes.

Microphones

Two separate wired microphone inputs with independent volume control for each. The microphone volume is independent of the start tone volume.

External 360 ° strobe

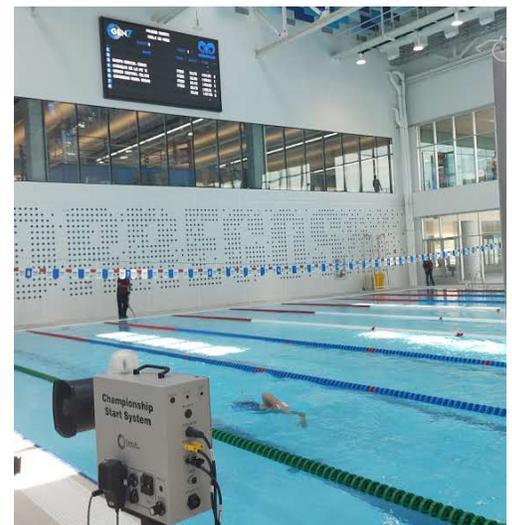

Flashes with start signal tone. Additional strobe lights for other locations are available.

Battery or 110/240V power

Use in a fixed location with 110/240VAC, or as a portable system with battery power. A LED low battery indicator provides an early alert that the battery level is getting low.

Public address system

The Championship Start System can serve as a limited public address system.
