

Deck Clock

The Colorado Deck Clock is an excellent deck side display solution, cleverly designed to prevent tipping. The deck clock features a ruggedized polyethylene enclosure that is water and sun resistant and completely corrosion free. The built-in handle allows for easy carrying from point to point.

Multi-functional

The deck clock can be used as a game/shot clock for many sports, or set to pace in time of day.

Bright LED digits

Variable intensity settings allow comfortable visibility in a variety of environments and times of day or night. Time of day or game time is displayed at the top, with 5" digits displaying hours and minutes. The large 10" digits show seconds for pacing or shot time.

2.4GHz integrated wireless

The deck clock wireless receives game/shot data from the CTS 2.4GHz tabletop or handheld controllers. Data can also be received from a CTS timing console with a 2.4GHz wireless adapter (WA-2).

Pacing

Pace in time of day (hours, minutes and seconds) without any controller. Multiple clocks will automatically synchronize in pace mode.

Integrated horn

The deck clock has an integrated weatherproof horn that produces both game and shot tones. This eliminates the need for separate game horn units.
