

Mini LED Scoreboard

Mini scoreboards are an ideal solution for facilities requiring portability, or that are tight on space.

The mini LED scoreboard line provides the best of both worlds; it provides the same information as two lines of LED-R scoreboard at a quarter of the size.

Features

- Lightweight and portable
- Includes legs and handle for easy portability
- Tripod mount
- Optional battery operation
- Can be stacked to create multi-line auxiliary scoreboard, or entry-level scoreboard solution
- Viewing distance of at least 50m
- Displays data through CTS timing consoles and the pace clock controller (UPC-C)

The mini LED scoreboards incorporate all of the information shown by two LED-R scoreboards into a smaller display, and can be mounted on a caddy, legs, or wall.
