

EVI QUICK START GUIDE

- Make all connections before powering on the starter.
- Connect the end of an R-015-747-xx cable with the black connector to the EVI input the black nut on the starter.
- Connect the other end of the cable with the blue connector to the connector with blue nut on the EVI.
- To connect additional EVIs:
 - Connect the black connector of an R-015-747-xx cable to the connector with the black nut on the previously connected EVI.
 - Connect the end of the cable with the blue connector to the connector with the blue nut on the next EVI.
 - Repeat for all EVIs.
- Once all EVIs are connected, the starter can be powered on.
- Connect the VSS controller to the VSS input on the starter to operate the Visual Start Signalling system.
