Training-size Touchpad		
<ul style="list-style-type: none"> • TR-SYS-1 includes TP-30 (30 x 22 in) • TR-SYS-1-220 includes TP-76X90 (76 x 90 cm) 		
	To Pace Clock Pro (see Pace Clock Pro manual for specific location)	
Pushbutton		
	An extension cable (optional) between the RJPLD and the Champ Start	
R-015-593		

Using your Train Right System

Your Train Right system can be used for a variety of training situations, including starts, relay exchanges, turn speed, and more. To use the system:

- 1) Refer to the **Pro Pace Clock** manual, *Training Modes* chapter, and choose a training mode.
- 2) Physically set up the system, following the instructions for that mode. For every mode, the *Training Modes* chapter of the **Pro Pace Clock** manual describes the equipment that is required and how to set it up, and how to operate it.

The connection diagram above provides a visual representation of all of the equipment. Please note two things about the R-015-027 cable for the RJPLD:

- 1) It can be plugged into either connection block on the RJPLD. Choose whichever is most convenient.
- 2) It consists of two cables put together. Plug the banana-plug end into the front of the Pro Pace Clock, where it's labeled **Relay Platform**. Plug the mini BNC plug end directly into the Champ Start where it's labeled **Speedlights**. If the Champ Start is too far from the RJPLD, use the R-015-593 cable as an extension between the two.

Banana plug

Mini BNC
