

Mini LED Swimming Scoreboard

Mini scoreboards are an ideal solution for facilities requiring portability, or that are tight on space.

The mini LED scoreboard line provides the best of both worlds; it provides the same information as two lines of LED-R scoreboard at a quarter of the size.

Features

- Lightweight and portable
- Includes legs and handle for easy portability
- Tripod mount
- Optional battery operation
- Can be stacked to create multi-line auxiliary scoreboard, or entry-level scoreboard solution
- Viewing distance of at least 50m
- Displays data through CTS timing consoles and the pace clock controller (UPC-C)
- Compatible with the Dolphin system through the Dolphin Scoreboard Adapter

Display

The mini LED scoreboards contain two lines of digits that can be configured in a multitude of ways to fit your needs for swimming. For specific configurations, please see reverse.

The mini LED scoreboards incorporate all of the information shown by two LED-R scoreboards into a smaller display, and can be mounted on a caddy, legs, or wall.
