5	Name5	Aff5	00.00	00:00.00	5
6	Name6	Aff6	00.00	00:00.00	6
7	Name7	Aff7	00.00	00:00.00	7
8	Name8	Aff8	00.00	00:00.00	8

The Standalone Template Editor provides customers with the flexibility to create and customize DisplayLink+ templates for their CTS video display on any Windows based computer. This standalone program is an extension of the DisplayLink+ template editor software provided with a CTS video display installation except there are no graphical outputs to a display. Once the template is created, it can easily be transferred via flash drive or cloud storage back to the primary facility DisplayLink+ computer and added to the template library.

The options are plentiful when creating templates for any sport, as you can easily change the positioning of data fields, font variables (color, size and style), and add images. Editing a template is easy, showing you what the display will look like as you place items on the screen.

The Standalone Template Editor for DisplayLink+ is available for download on our online store.
